No

NA

Vents in Place and Operational

Yes

No

NA

Depth of Sludge & Percent Capacity

\_\_\_\_\_

Other notes & conditions:

\_\_\_\_\_

\_\_\_\_\_

\_\_\_\_\_

\_\_\_\_\_

Disclaimers & notes:

- 1) The waiver system is generally designed for 2 or fewer persons on a year round basis or seasonal use by no greater number of persons than allowed by the construction approval document or estimated by the Town for non-state approved systems.
- 2) Waivers shall not be granted for any commercial use or short term rental type properties.
- 3) In no case shall a septic tank be pumped less than once every 6 years.
- 4) In the case where a pretreatment system is used that requires a maintenance agreement and/or periodic inspection by the manufacturer, the home owner is required to keep the periodic manufacturer inspection current and provide a copy of each inspection record.
- 5) Generally, a state approved system less than 10 years old will not require a septic inspection. State approved systems greater than 10 years old but less than 20 years will require a site visit. If a site visit warrants further examination, an inspection will be requested prior to approval. State approved systems greater than 20 years old, or have no State approval, regardless of age, will require an inspection by a Certified Septic Evaluator. A copy of an inspection report will be accepted.

OFFICE HOURS: Mon., Tues., Thurs., Fri. – 8:00 A.M. to 5:00 P.M. • Wed. – 8:00 A.M. to 1:00 P.M.
